## ZOOLOGICAL BIBLIOGRAPHY

Volume 4, begun in late 2015, has taken time to fill (minimum 160 pages) partly because we elected to set aside volume 5 as a special volume dealing with the publication by Alcide d'Orbigny called "*Voyage dans l'Amérique méridionale*". Two interesting papers intended to go into this volume did not do so. One by Murray Bruce on the subject of George Gray's "*Genera of Birds*" has been received and sent out to peer-review; based on this referee's report – we await the second – we are confident that this will be included in volume 6. The other, from Aasheesh Pittie, has lost its way and we have chosen to take its name off the list of coming papers until we actually receive the submission, which we hope is still intended. So in April 2018 we can declare volume 4 complete with 7 articles totalling 180 pages.

Volume 5, 'A study of d'Orbigny's "*Voyage dans l'Amérique méridionale*"', has so far seen four papers totalling 274 pages published in 2017/18. Two other lengthy papers are in preparation as are two very short ones, and other short ones may follow.

Meanwhile volume 6 has been begun in March 2018. We continue to encourage others, especially those working with other branches of zoology, who find themselves involved in exploring dates of publication or who find original wrappers to publish in this journal. However, we have also suggested that the Archives of Natural History should be chosen when papers sent to us are more to do with the history of natural history than with bibliography.

As stated in the inside front cover of volume 3 we will also consider publishing articles that relate to or require a First Reviser action in a context where two publications were or are in competition for precedence. All Zoological Bibliography papers are registered in ZooBank and the key words should draw attention to any new nomenclatural acts. Every paper in this journal is sent out to at least two persons with a request for a peer-review.

## INSTRUCTIONS FOR AUTHORS

Authors wishing to publish in this journal are invited to use the Aves Press website to reach the editor with an outline proposal giving the title, authors, draft abstract, expected page requirements and needs for illustration, on a single page if possible. If the subject is not obviously connected to zoological bibliography then the proposal should explain the relevance. This journal does not carry original descriptions of taxa that are being newly proposed; by contrast proposals of *nomina nova* and most other nomenclatural acts will be welcome, e-publication combined with ZooBank registration and archiving by the British Library helps ensure the requirements of the International Code of Zoological Nomenclature are met.

The single spaced manuscript should be submitted by e-mail as a Word ® document or in RTF format. Even short papers should include an abstract and keywords (max. 8). Subheadings in bold type are encouraged. Footnotes are permitted; end notes are not. Use automatic footnote numbering page by page.

**References:** should not be abbreviated; pagination should be given in expanded form (e.g. not x, 500 but i-x, 1-500); italics should be used for book titles but not volume numbers, when citing periodicals use italics for the journal name not the article title. See examples below for detailed formatting:

**Scientific names:** must comply with the requirements of the ICZN; original spellings should have been researched and used, with gender agreement addressed where necessary. Use of a spelling that is not the original spelling (where appropriate amended as required by the Code) should in each instance be explained in a footnote. Changes to an original spelling mandated by Article 32.5 of the Code (ICZN, 1999) should be retained. It will be appreciated if an emendation or an Incorrect Subsequent Spelling (Art. 33) is deliberately used that this be footnoted and explained.

**Dates:** where month-dates or day-dates are used the format should be day, month, year, except in quotations, unless good cause can be shown for departing from the house style. In cases where both a correct publication date and an imprint date must be given please consult the Editor.

**Tables:** should be within gridlines (which may or may not be reproduced). If such tables are to be inserted in the text the preferred position for each of them should be clearly indicated. Tables longer than 100 mm should be supplied as a separate file (Word ® or Excel ®) not embedded in the text.

**Author's Address:** this is to appear at the end of the article; the mention of an e-mail address is not mandatory.
